Table of Contents
Corrosion, Vol. 32, 1976

January

Editorial: Who Educates the Professional?
R. W. Staehle 1
Hydrogen Problems in Energy Related Technology
J. P. Hirth and H. H. Johnson 3
Concerning Strain-Enhanced Corrosion Mechanisms of SCC
David A. Vermilyea and
Ronald B. Diegle 26
Electrochemical Behavior of 80% Sn-Cu Alloy in Some Carboxylic Acids and Buffer Solutions
M. S. Abdelaal, I. M. Issa, and
M. M. Seleem 30
On the Decohesion Model of Hydrogen Embrittlement
H. P. van Leeuwen 34

February

Editorial: Hoar-CFIT-Cotton
R. W. Staehle 39
Hydrogen Evolution and Corrosion Behavior of Fe-Ni Alloys in H_2SO_4—Effect of Temperature, Cl^- and Benzotriazole
Dan Altura and Ken Nobe 41
The Significance of the Protection Potential for Fe-Cr Alloys at Room Temperature
K. K. Starr, E. D. Verink, Jr.,
and M. Pourbaix 47
Hydrogen-Stress Cracking of Low-Carbon Martensitic Steel
J. H. Payer, A. G. Preban,
and H. P. Leckie 52
Stress Corrosion Cracking of Mild Steel in Ammonium Carbonate Solution
Donald Hixson and H. H. Uhlig . . .56
Chemistry of Crevice Corrosion as Observed in Certain Cu-Ni and Fe-Cr Alloys
E. D. Verink, Jr., K. K. Starr,
and J. M. Bowers 60
Pitting Corrosion of Steel in H_2S Solutions
L. M. Dvoracek 64
The Mechanism of Corrosion of Polybutadiene-Coated Steel in Aerated Sodium Chloride
Henry Leidheiser, Jr.
and Martin W. Kendig 69

March

Editorial: The Office of Technology Assessment
R. W. Staehle 77
Effect of Composition and Structure on Crevice, Intergranular, and Stress Corrosion of Some Wrought Ni-Cr-Mo Alloys
Michael A. Streicher 79
Dissolution of Nickel in the Presence of Hydrogen Sulfide and Its Consequences on the Mechanism of Pit Nucleation
M. Kesten 94
Stress Corrosion Cracking Susceptibility of β-Titanium Alloy 38-6-44
Walter F. Czyrklis
and Milton Levy 99
Fractography of Sulfide Stress Cracking
M. Watkins, M. F. Bluem,
and J. B. Greer 102
The Effects of Residual Magnetism on the Corrosion Fatigue Properties of Type 410 Stainless Steel Compressor Blades
J. D. Collins 109

April

Editorial: Kolotyrkin, Thomas, and the Corrosion Society
R. W. Staehle 115
Stress Corrosion Cracking of High and Low Strength Carbon Steels in Nitrate Solutions
Aziz Asphahani and
H. H. Uhlig 117
Acoustic Emission Method for Monitoring Corrosion Reactions
T. W. Rettig and M. J. Felsen . . . 121
Analysis of Errors in Measuring Corrosion Rates by Linear Polarization
R. Bandy and D. A. Jones 126
Molten Salt Anodization of High Strength Aluminum Alloys 1. Stress Corrosion Inhibition
F. H. Cocks, D. R. Cogley, G. H. Holleck,
G. F. Hurley, and C. R. Mitchell . . 135
Some Electrochemical Aspects of the Stress Corrosion Cracking of Steels in Liquid Ammonia Environments
D. C. Deegan, B. E. Wilde,
and R. W. Staehle 139
The Effect of Uncompensated IR-Drop on Polarization Resistance Measurements
Florian Mansfeld 143
High Corrosion Resistance of Chromium-Bearing Amorphous Iron Alloys in Neutral and Acidic Solutions Containing Chloride
Masaaki Naka, Koji Hashimoto,
and Tsuyoshi Masumoto 146
Accelerated Grain Boundary Corrosion of Dilute Zinc-Aluminum Alloys Under High Applied Cathodic Currents
L. P. Devillers and
P. Niessen 152
Technical Note: Influence of Crystallinity on Corrosion Behavior of Ferrous Alloys
R. B. Diegle and J. E. Slater . . . 155
Technical Note: The Effect of Nickel Content on the Stress Corrosion Resistance of Fe-Cr-Ni Alloys in an Elevated Temperature Caustic Environment
A. J. Sedriks, S. Floreen,
and A. R. McIlree 157

May

Editorial: When Does Information Give Power?
R. W. Staehle 161
A Fractographic Analysis of Environmental Fatigue Crack Propagation in Ti-6Al-4V Sheet
R. J. H. Wanhill 163
Potentiostatic Anode Film Growth on Bismuth
I. A. Ammar, S. Darwish,
and M. W. Khalil 173
Hydrogen Diffusion Coefficients in Ferrovac 1020 and Cr-Mo Alloy Steels
Olimpio F. Angeles, Richard J. Stueber,
and Gordon H. Geiger 179
A Quantum-chemical Study of the Corrosion Inhibition of Iron by Means of Aniline Derivatives in Hydrochloric Acid
Jan Vosta, Jaroslav Eliasek,
and Petr Knizek 183
Stress Corrosion Cracking in Fe-Mn-Cr Alloys
Markus O. Speidel 187
Allan Talbott Gwathmey—Scientist, Scholar, Gentleman, July 29, 1903-May 12, 1963
Henry Leidheiser, Jr. 191
The Influence of Specimen Type and Heat Treatment on the Caustic Stress Corrosion Cracking of Some Stainless Alloys
I. L. W. Wilson and
R. G. Aspden 193
Technical Note: Transition of Cracking Mechanisms from Active Path Corrosion to Hydrogen Embrittlement in High Strength Steels in a Boiling Nitrate Solution
Hideya Okada, Ken-ich Yukawa,
and Hideo Tamura 201
Technical Note: Influence of Deionized Water on the Anodic Behavior of Active-Passive Metals
F. C. Sessa and
N. D. Greene 203

June

Editorial: The Regularization of Adventitious
R. W. Staehle 207
Effect of Thin Electrodeposited Nickel Coatings on the Corrosion Behavior of U-0.75 Ti
L. J. Weirick and
D. L. Douglass 209
Topographies of Thick Cu-Benzotriazolate Films on Copper
T. Notoya and
G. W. Poling 216
Effect of Hydrogen on the Corrosion of Steels in High Temperature Water
Ph. Berge, C. Ribon,
and P. Saint Paul 223
Effect of Cold Work on the Corrosion Resistance of Nonsensitized Austenitic Stainless Steels in Nitric Acid
Christopher Hahin, Robert M. Stoss,
Bruce H. Nelson, and
Philip J. Reucroft 229

Effect of Tolyltriazole on Iron Corrosion and the Hydrogen Evolution Reaction in H_2SO_4
Nadia Eldakar and Ken Nobe . . . 238
Erosion-Corrosion of Copper-Nickel Alloys in Sea Water and Other Aqueous Environments—A Literature Review
Barry C. Syrett 242
The Structure and Composition of Thick Tarnish Films on Alpha-Phase Copper Alloys
H. Gabel, J. A. Beavers, J. B. Woodhouse, and E. N. Pugh 253

July

Editorial: Corrosion as Part of the National Anti-Wastage Ethnic
R. W. Staehle 261
Molybdates as Corrosion Inhibitors in the Presence of Chlorides
E. A. Lizlovs 263
Fracture of Tarnish Films on α-Brass
R. P. M. Procter and M. Islam 267
Grain Boundary Corrosion of AISI Type 304L Steel in an H_2SO_4/NaCl Environment
Timo J. Hakkarainen and Antero Honkasalo 271
Localized Corrosion Resistance of Mn-Substituted Austenitic Stainless Steels: Effect of Molybdenum and Chromium
R. J. Brigham and E. W. Tozer 274
Environmental Factors in Stress Corrosion Cracking and Anodic Polarization of Zirconium in Methanol-HCl Solutions
G. C. Palit and K. Elayaperumal 276
Effect of Ultrasonic Waves on the Pitting Potentials of 18-8 Stainless Steel in Sodium Chloride Solution
T. Nakayama and K. Sasa 283
Pitting of High Purity Zinc and Pitting Potential Significance
M. G. Alvarez and J. R. Galvele 285
Ellipsometric Studies on Iron Oxide Film Growth at 100 to 350 C
Z. Szlarska-Smialowska and J. Jurek 294
Corrosion Products of Iron Dissolution—Dependence on Anions in Solution
Beverly J. Alexander and R. T. Foley 297
Technical Note: Effect of Titanium on the Susceptibility of Mild Steel to Caustic Cracking
R. B. Diegle and D. A. Vermilyea 303

August

Editorial: Etymology, Etiology, and Epistemology
R. W. Staehle 307
Susceptibility of the Oxide Film Formed on Steel in Air at 100 to 400 C to Local Breakdown in Borate Buffer Solutions Containing Cl^- Anions
J. Jurek and Z. Szklarska-Smialowska 309
Stress Corrosion Susceptibility of Aluminum Cartridge Cases
M. A. Pelensky and A. Gallaccio 312
Corrosion at a Holiday in an Organic Coated-Metal Substrate System
B. D. Craig and D. L. Olson . . . 316
Hydrogen Electrode Reaction and Hydrogen Embrittlement of Mild Steel in Hydrogen Sulfide Solutions
Asahi Kawashima, Koji Hashimoto, and Saburo Shimodaira 321
An Improved Ni-Cr-Mo Alloy for Corrosion Service
F. G. Hodge and R. W. Kirchner 332
Crack Propagation Resistance of Alpha-Brass Subjected to Prior Exposure in Corrosive Environments
Y. W. Mai 336
Corrosion Inhibition of Copper by Tolyltriazole
R. Walker 339

September

Editorial: Structure of the Federal Materials Establishment
R. W. Staehle 345
The Role of Alloyed Molybdenum in Austenitic Stainless Steels in the Inhibition of Pitting in Neutral Halide Solutions
Katsuhisa Sugimoto and Yoshinobu Sawada 347
Strain Enhanced Corrosion in the Iron-Caustic System
Ronald B. Diegle and David A. Vermilyea 353
Residual Stresses in Bent Tubes for Nuclear Steam Generators
Ph. Berge, H. D. Bui, J. R. Donati, and D. Villard 357
Corrosion-Erosion Behavior of Materials in a Coal-Gasification Environment
K. Natesan 364
The Effect of Oxygen on Hydrogen Transport in Copper
G. R. Caskey, Jr., A. H. Dexter, M. L. Holzworth, M. R. Louthan, Jr., and R. G. Derrick 370
The Construction and Performance of a Silver/Silver Chloride Reference Electrode for High Temperature Aqueous Environments
I. J. Magar and P. E. Morris 374
Sulfide Stress Cracking Behavior of Some "Big-Inch" Line-Pipe Steels
G. J. Biefer 378
Technical Note: Instrumentation for Measurements of Galvanic Currents as a Function of Velocity of Metal/Electrolyte
F. Mansfeld 380

October

Editorial: Engineering Research Laboratories and the Fabric of Technology
R. W. Staehle 383
70th Birthday Biography of Dr. Go Okamoto
Norio Sato 385
Stress Corrosion Cracking of Mild and Low Alloy Steels in CO-CO_2-H_2O Environments
Masamichi Kowaka and Saburo Nagata 395
Precipitation Reactions in Inconel Alloy 600 and Their Effect on Corrosion Behavior
R. C. Scarberry, S. C. Pearman, and J. R. Crum 401
A Versatile Polarization Cell System
R. E. Geisert, N. D. Greene, and V. S. Agarwala 407
Deformation of Iron Oxides Formed in Caustic Electrolyte
Ronald B. Diegle and David A. Vermilyea 411
Triazole, Benzotriazole, and Naphthotriazole as Corrosion Inhibitors for Brass
R. Walker 414
Technical Note: Analysis of Iron Carbide Dissolution Products
J. H. Payer and R. W. Staehle 418

November

Editorial: Corrosion Costs-AGARD-Promisel
R. W. Staehle 421
Investigation of the Mechanism of Stress Corrosion Cracking in High Strength Steels
Y. A. Marichev and I. L. Rosenfeld 423
Stress Corrosion Cracking of Mild Steel in Ammonia Vapor Above Liquid Ammonia
P. B. Ludwigsen and H. Arup . . . 430
Analysis of Iron Corrosion Products Using Mössbauer Spectroscopy
M. J. Graham and M. Cohen . . . 432
Effect of Oxygen on the Electrochemical and Corrosion Behavior of Rotating Nickel Disks in H_2SO_4
W. D. Jeffers and Ken Nobe . . . 438
Internal Hydrogen Embrittlement of Gamma-Stabilized Uranium Alloys
G. L. Powell, J. W. Koger, R. K. Bennett, A. L. Williamson, and V. C. Hemperly 442
Factors Affecting Stress Corrosion Resistance of the Ti-8Mo-8V-2Fe-3Al Metastable Beta Titanium Alloy
R. Chait and P. Lum 450
Technical Note: Specimen Holder for Surface Preparation of Corrosion Test Samples
Jiri Jelinek 455

December

Guest Editorial: A Highly Dispersed Food Reserve
Henry Leidheiser, Jr. 459
The Breakdown and Repair of Inhibitive Films in Neutral Solution
Morris Cohen 461
Bulk and Surface Hydrogen Concentration Differences in NBS Hydrogen-In-Titanium Standards
K. B. Das 466
Stress Corrosion Cracking of Admiralty Brass in Aqueous Copper Sulfate
T. R. Pinchback, S. P. Clough, and L. A. Heldt 469
Fatigue Crack Growth in an X65 Line-Pipe Steel in Sour Crude Oil
O. Vosikovsky 472
Environmental Resistance of Pure and Alloyed γ′Ni_3Al and β-NiAl
R. L. McCarron, N. R. Lindblad, and D. Chatterji 476
Program Preview of CORROSION/77 . 482
Indices of Papers Published in 1976 . 493

Alphabetical Subject Index
Corrosion, Vol. 32, 1976

A–B

ACIDS
carboxylic, aerated and deaerated vs 80SnCu, 30
chromic, NiCrMoFeW vs, 84
general, NiCrMoFeW alloys vs, 79
hydrochloric vs 1 to 10 Cr, + or - 5 to 20Ni + P, C steels, 146
—beta C Ti SCC in methanol +, 99
—brass 70/30 inhibition by azoles, 415
—vs iron, aniline inhibitors' quantum chemistry analysis, 183
—+ mechanol, SCC of Zr, 276
—NiCrMoFeW vs, 82
—NiCrMo Hast C-4 vs, 333
phosphoric, vs brass 70/30, inhibition by azoles, 415
nitric, 65% vs 304, 316, infl of cold work, 229
—brass 70/30 inhibition by azoles, 415
—brass, alpha cracking in, 336
sulfuric vs 1 to 10 Cr, + or - 5 to 20 Ni + P, C vs 30 C, 146
—brass 70/30, inhibition by zoles, 415
—hydrogen evolution by FeNi alloys in, 41
—vs iron, tolyltriazole inhibition, 238
—NiCrMoFeW, 82
—Ni 200 rotating disc, infl of oxygen, benzotriazole, 438
—+ sodium chloride vs 304L, 271

Acoustic emission monitoring of reactions, 121
Air vs steel high strength in 25 C liquid ammonia, 141

ALUMINUM AND ALLOYS
7475 cartridge cases, SCC tests, 312
7075 vs NaCl sol., infl of coatings on stress attack, 135
coatings on high strength vs stress corrosion, 135
fatigue crack fractography, 163
+ Zn, grain boundary attack influenced by, 152

Ammonia brass 70/30, tarnish from, 267
Ammonia, liquid, SCC of high strength steel at 25 C, 139
Ammonia, tarnish films on alpha Cu alloys in, 253
Ammonium, carbonate vs steel, C, SCC in, 56
Ammonium chloride vs brass, alpha, cracking in, 336
Ammonium compounds vs 70/30 brass, inhibition by azoles, 415
Ammonium hydroxide: tolyltriazole on Cu vs solutions of, 341
Ammonium nitrate vs C steels, SCC, 56, 117
Amorphous iron alloys, 146, 155
Anodic polarization: 80SnCu in carboxylic acids, 33
Area effects in holidays in organic coatings on steel, 317

ATMOSPHERIC EFFECTS
Beta C Ti vs NaCl in, 99
hydrogen concentration in CuZnSn cracking, 471
iron corrosion product analysis, 435
sodium chloride vs fatigue attack on 410, infl of residual magnetism, 109

ATOMIC EFFECTS
chloride ion adsorption phenomena on 304L grains, 272
defects, infl on acid, chloride attack on amorphous Cr, CrNi steels, 151
dislocation pinning by magnetism, residual in 410, 111
dislocations from cold work infl on CrNi steels vs nitric acid, 235
hydrogen diffusion and mobility, 9
hydride-forming metals, hydrogen vs, 17
hydrogen in stressed C steel vs hydrogen sulfide, 321
methane nucleation at metal carbides, 16
pit nucleation by sulfides on Ni, 94
p-substituted anilines' as HCl inhibitors, quantum chemistry analysis, 183
slip profiles in Al fatigue cracking, 171

Atmospheric effects: moist vs Ni electroplate on U-Ti, 209
Bismuth: anodic films in sulfuric and phosphoric acids, benzoate and borate sol., 30 C, 173

C

Calcium nitrate, 110 C vs steels, high strength, cracking mode, 201
Calcium nitrate vs steels, C, SCC tests, 117

CALCULATIONS AND STATISTICS
2 and 3 electrode linear polarization errors, calculations, 126
hydrogen cracking reactions vs C steel, calculations, 327
hydrogen embrittlement decohesion model analysis, 34
IR drop compensation in polarization tests, calculations, 143
strain rates required for SCC, calculation of, 26

CARBON
geothermal systems, used in, 21
dioxide + monoxide-water SCC of C steels, 395
monoxide + dioxide-water SCC of C steels, 395
NiCrMoFeW, infl as alloy in, 81
pipes vs less than 120 C acids, 21
steel, C, infl on SCC in ammonium carbonate, 58
SCC by Ca and ammonium nitrate, infl on, 117
Carburization: coal gasification plant materials, 367
Cathodic protection: greater than 5 mA/sq cm vs ZnAl, grain boundary attack, 152

CHLORIDES
vs CuNi, FeCr, activity in crevices, 62
ferric vs amorphous Cr + or - Ni steel, 151
+ hydrogen sulfide solutions vs 1080 steel, 64
ion adsorption on 304L grain boundaries, 273
molybdate inhibitor vs, 263
NiCrMoFeW, titanium as stabilizer vs, 93
pitting vs nitrate and phosphate films, 461
SCC high strength steel, infl on, 428
Chlorine: hydrogen evolution on FeNi in sulfuric acid, infl of, 41
Chromium: iron +, infl of content on passivation, 47
Chromium: NiAl vs 870 C gases, benefits as alloy, 481
Chromium: steel, C, infl on SCC in ammonium carbonate, 59
Chromium: CuNi, infl on crevices in, 60
Coal gasification: high temp. materials applications, 364
Coal gasification, hydrogen effects in, 11
Coal: hydrogen production using, 15

COATINGS
conversion: anodic films on bismuth, 173
—anodized in less than 140 C Li and potassium nitrate + Na, Zn chromate, 136
general: acoustic evaluation of, 123
metal, Cr infl on steel, LC; hydrogen cracking, 52
—Ni electroplate on U-Ti vs air, NaCl sol, effect of porosity, 209
—Zn infl on steel, LC hydrogen cracking, 52
organic on Al high strength vs 3.5% NaCl, 135
—galvanic attack at holiday in, 316
—polybutadiene on steel vs aerated NaCl, 69

Cold work, see fabrication
Combustion gases: 870 C S + sea salt combination vs gamma and beta NiAl + alloying elements, 476

COPPER AND ALLOYS
80 Sn vs carboxylic acids, 30
atmospheric tests with benzo and tolyltriazole, 339
benzotriazole films on, analysis, 216
brass 70/30, fracture mode of tarnish on, 267
brass 70/30, triazole, benzotriazole, maphthotriazole as inh. vs halide sol., 414
brass, alpha, cracking phenomena vs ammonium chloride, nitric acid, 336
brass CuZnSn SCC in Cu sulfate sol., 469
galvanic attack in NaCl, infl of velocity, measurement of, 380
CuNi erosion-corrosion in sea water, literature review, 242
CuNi galvanic effects in sea water, 247
Cu sulfate vs CuZnSn, 469
+ Ni, Cr, crevice chemistry, 60
sodium hydroxide 13%, 290 C vs, 224
tarnish on CuAl, CuNi and CuZn, 253
tolyltriazole as inhibitor vs less than 400 C oxidation, 339

Condensation: ammonia in tanks, 430
Corrosion control, definition of NACE role in, 307
Corrosion products: crevices in Cr-modified CuNi and FeCr alloys, 61
Cotton, Joe, 39
Cracking: corrosion and strain rate factors in, 26
Crevices, see localized attack
Crystallinity effect on ferrous alloys vs sulfuric acid-NaCl sol., 155

D–E

Deactivation: definition, 48
Deionized water infl on passivity of CrNiFeMoMn alloy, 203
Deuterium absorption by Cu, 371
Economics: hydrogen production, 11
Electrical effects: polymer coatings penetration by oxygen and/or water, 70
Energy systems: hydrogen degredation in, 3
Engineering research laboratories' role in U.S. materials technology, 383
Erosion: coal gasification plant materials vs, 368
Erosion-corrosion: CuNi in fresh and salt waters, 242

F

FABRICATION
cold rolling of steel LC vs hydrogen cracking, 53
cold rolling C steel vs SCC in nitrates, 120
cold work infl vs boiling 65% nitric acid attack on 304, 316, 229
cold work, infl on C steel SCC in ammonium carbonate, 57
cold work infl on residual stresses, Inconel 600 tubes, 361
stress infl on Al cartridge cases vs boiling NACE sol., 312
stresses in Inconel 600 tubes, 358
Ti extrusion vs SCC, 454
Ti hot forging vs SCC, 451

Fatigue: 410 gas turbine rotor blades, infl of residual magnetism, 109
—cracking: fractography of Al, 163
—cracking of X65 C steel in crude petroleum + hydrogen sulfide, 472
—hydrogen infl on, 10

FILMS AND SCALES
on amorphous Cr and CrNi alloys, analysis, 152
brass tarnish rupture mode, 267
iron from acidic halide sol., properties, 297
iron oxide, ellipsometric study, 100-350 C, 294
iron oxide from NaOH, fracture mode under stress, 411
iron oxide and sulfide on 1080 steel vs, NaCl-hydrogen sulfide sol., 65
magnetite pitting compared to hematite vs buffered NaCl sol., 312
Mo infl on CrNiMo in NaCl sol., 350
nitrate and phosphate films breakdown ~6 pH, 461
oxides on 80SnCu in carboxylic acids, 33
rupture mechanism for caustic SCC, 356
steel, high strength in liquid ammonia, 141
tarnish, thick on alpha Cu alloys, 253

Fractography of Al fatigue cracks, 163
Fractography: API high strength steels vs hydrogen sulfide, 102
Fractography: grain boundary attack on 304L, 271
Fractography: steel C embrittled by hydrogen sulfide, 325

G

Galvanic attack, acoustic emissions generated by, 122
Galvanic attack at holiday in organic coating on steel, 316
Galvanic attack, measurement of velocity effects, 380
Geothermal systems: attack characteristics in, 20
Geothermal systems: carbon used in, 21
Geothermal systems; hydrogen effects in, 4

GRAIN EFFECTS
boundary attack in 304L vs sulcuric acid/NaCl, 271
brass in ammonium chloride, nitric acid, 337
carbide precip. effects in Inconel 600, 402
carbide precip. in NiCrMo, 332
C in steels vs SCC in Ca and ammonium nitrates, 119
Cu infl on benzotriazole films, 216
depleted zone shearing in cold worked 304, 316, 229
hydrogen, 11
NiCrMoFeW acids, 79
Zn + Al, cathodic currents vs, 152

Gwathmey, Allan T., 191

H

HALIDES
vs brass 70/30, infl of triazole, benzo and naphthotriazole as inhibitors, 414
vs iron MnCr steels, cracking influence, 187
vs iron, properties of films, 297
vs NiCrMo, infl Mo ions vs pitting in NaCl, 347
Zn 99.99+, pitting potentials vs, 285

Hardness, effect vs SCC of high and low strength steels in Ca and ammonium nitrates, 117
Hastelloys, 79, 332

HEAT TREATMENT
Al7475 cartridge cases vs boiling NaCl, infl of, 312
vs caustic cracking of ferritic alloy, 201
Inconel 600 tubes, vs residual stresses, 359
NiCrMo, Hast C-4, 333
NiCrMoFeW, 79
steel, C vs ammonium carbonate infl on SCC, 57
steels, high and low strength vs SCC in ammonium or Ca nitrate, 117
Ti beta metastable vs SCC, 451
U + Mo, Nb, Zr vs hydrogen embrit., 443

Hot corrosion: beta and gamma NiAl, 479
Hot corrosion in coal gasification plants, 365

HYDROGEN
80SnCu, evolution in buffered carboxylic acids, 31
1020 steel diffusion, 370-620 C, 179
attacks, on metals, 5, 6, 19
blistering, 5
coal gasification effects, 11, 18
coal for production of, 15
degradation phenomena in, 3, 11
embrittlement of Cu, infl of oxygen, 370
—decohesion theory, 18, 34
—general, 5, 7
—research impact on mechanism delineation, 19
—of steel, C by sulfide, 321
—steel, high strength, 423
—steel, high strength in 120 C Ca nitrate, 202
—stress phenomena in, 23
—U-Mo, Nb and Zr stabilized alloys, 442
hydride-forming metals vs, 17
iron-Ni alloys' evolution in sulfuric acid, 41
vs iron oxides at 290 C, 224
NBS concentration-in-Ti standard, application, 466
research suggestions, 19, 22
vs steel, high strength in 25 C liquid ammonia, 139
stress cracking, 5, 52
sulfide vs X65 C steel in crude petroleum, 472
—+ chlorides vs 1080 steel, 64
—embrittlement of C steel, 321
—Ni pit nucleation by, 94
—stress cracking of high strength steels, 21, 102, 378, 423
ZnAl grain boundary attack by, 152

I–K

Inconel 600 composition, 401
Indian Inst. of Technology, Kharagpur, 38
Information, value of, 161

INHIBITORS
vs acid, sulfuric attack on FeNi, 41
acoustic evaluation, 122
aniline quantum chemistry analysis vs HCl attack on iron, 183
benzotriazole on Cu vs acids, film analysis, 216
benzotriazole for Ni vs sulfuric acid, 438
benzotriazole vs sulfuric acid, 41
molybdates vs chlorides, sulfates, 263
Mo in NaCl, halide sol. to protect NiCrMo alloys, 347
nitrite and phosphate film activities in neutral sol., 461
sodium nitrate for C steel, 120
sodium nitrate vs SCC of Beta C Ti in methanol, 99
sodium phosphate for steel in NaCl, 120
tolyltriazole vs atmos, S solutions' attack on Cu, 340
tolyltriazole for iron vs sulfuric acid, 238
water in 25 C liquid ammonia vs steel, high strength, 142

IRON AND ALLOYS
99.94% iron vs NaOH sol., strain rate factor analysis, 353
vs acidic halide sol., properties of films on, 297
amorphous compared to crystalline, effect of crystallinity, 155
carbide dissolution product analysis, 418
corrosion product analysis, 432
+ Cr, 410 compression blades, effect of magnetism on corrosion fatigue, 109
—ammonium carbonate vs, 56
—amorphous + P, C vs sodium, iron chlorides, sulfuric acid less than 60 C, 146
—crevice chemistry, 62
—protective potential effects on passivation, 47
+ CrNi, nickel infl on SCC in sodium hydroxide, 157
hydrochloric acid vs, quantum chemistry analysis of aniline inhibitors in, 183
+ Ni, ammonium carbonate vs, 56
oxides, 100-350 C ellipsometric study, 294
oxides from NaOH, fracture infl on steel SCC, 411
SCC vs NaOH sol, infl on Ti as alloy, 303
tolyltriazole inhibitor for sulfuric acid, 238

Karbate, 21

L

Lithium chloride vs Hastelloy C, 91

LOCALIZED ATTACK
brass, alpha in ammonium chloride, nitric acid, 338

crevice chemistry in CuNi, FeCr alloys, 60
crevice, Hast C276 compared to C4, 336
crevice attack on NiCrMoFeW by acids, 86
grain boundary, 304L in sulfuric acid-NaCl, 271
intergranular of NiCrMoFeW, 83
pit nucleation in Ni by sulfides, 94
pitting of 100-400 C Fe oxides by NaCl, 309
—of 18-8 in NaCl, 283
—304, 316 cold worked vs boiling nitric acid, 237
—1018 steel in Na chloride + hydrogen sulfide solutions, 64
—C steel in 13% NaOH, 290 C, 224
—CrNiMo in halides, infl of Mo ions vs, 347
—crevice on Mn-substituted CrNi steels, 274
—gas turbine blades in NaCl atmos., 109
—NiCrMoFeW, 87
—nitrite, phosphate films infl on, 461
—Zn 99.99 + potentials in halides, 285
tarnish, brass transgranular cracking, 267
Zn 99.99 + pit morphology in halide sol., 287

M—N

Magnetism, corrosion fatigue of 410 compressor blades, infl on, 109
Manganese: CrNiMnMo steel, substitution of Mn effects on pitting, crevice attack, 274
Materials conservation activities of U.S. federal government, 345
Metal dusting in coal gasification plants, 368

METALLURGICAL EFFECTS
alloying of CuNi vs sea water erosion-corrosion, 246
Cu and Pb alloying of ZnAl vs cathodic currents, 154
martensitic infl in cold worked CrNi steels vs nitric acid, 237
microstructure infl on SCC of LC martensitic steel, 53
Mu phase, carbide precip controls in Hast C-4, 332

Methane, nucleation at carbides, 16
Methanol: Beta C Ti 38-6-44 SCC in, 99
Methanol: + HCl vs Zr, 276

MOLYBDENUM
molybdates as inhibitors for 1010 steels vs chlorides, sulfates, 263
NiCrMoFeW infl vs acids, 79
vs pitting of Ni by sulfides, 97
steel, C infl as alloy vs SCC in ammonium carbonate, 59

NICKEL AND ALLOYS
see iron + Ni also
200 rotating disc vs sulfuric acid, infl oxygen, benzotriazole, 438
Hastelloys, infl of C, Mo, Ti, W, 79
Inconel 600, grain precipitates' effects in, 401
Inconel 600, residual stress in tubes, 357
NiAl and NiAlCr + γ, Ta, Ti, or W vs 870 C sulfuric distillate fuel + sea salt, 476
NiCrMo properties of Hast. C-4, 332
pit nucleation by sulfides, 94
PWR, Inconel 600 tubes, control of residual stresses for steam generators in, 357
steel C, infl as alloy on SCC in ammonium carbonate, 58

Nitrates vs iron MnCr steels, cracking infl, 190
Nitrogen vs steel, high strength in 25 C liquid ammonia, 139
Nuclear reactors: magnetite dissolution by hydrogen in 290 C high purity water, 224

O

Okamoto, Go, 385
Ordnance: Al cartridge case stress cracking tests, 312

ORGANIZED STUDIES
Battelle Columbus Laboratories, 159
Committee for Industrial Technologies, United Kingdom, 39
hydrogen reactions, suggested, 13
Inco research lab, 342
Indian Inst. of Technology corrosion engineering research, 38
Merica, Paul D. research lab, Inco, 342
Texas Inst. Inc. laboratory, 304
University of Liverpool, England, 258
University of Newcastle upon Tyne, England, 204

OXIDES
anodic films on bismuth, 173
Cu, benzotriazole films on, 216
iron vs 290 C Na hydroxide, 224
iron from NaOH, fracture under stress, 411
NiCrMo vs halides, infl of Mo ions, 351
steel vs NaCl borate buffered sol., pitting, 309

OXYGEN
200 Ni rotating disc vs sulfuric acid tests in, 438
ammonia vapor contents, 430
coal gasification plant materials, infl of, 364
Cu hydrogen diffusivity, infl of, 370
erosion-corrosion of CuNi in sea water, infl of, 244
halide solutions, infl on pitting of CrNiMo, 347
vs iron, spectral features of films in halide sol., 298
+ molybdates vs chlorides, sulfates' attack on steel, 263
organic coatings permeated by, 69
vs steel, high strength in 25 C liquid ammonia, 139

P—R

PASSIVATION
iron-Cr alloys at protection potentials, 47
steel in chlorides, sulfates by molybdates, 263
Zn 99.99+ in halide sol., 285
Zr by water in methanol-HCl sol., 281

Permeation: hydrogen into Cu, 371
Permeation: polybutadiene, other coatings on steel by water, oxygen, 70
Petroleum, crude + hydrogen sulfide vs X65 C steel, 472

pH
brass 70/30 infl on benzotriazole inhibition in sulfuric acid NaOH, 415
chloride-hydrogen sulfide solutions, infl vs 1080 steel, 68
erosion-corrosion by water, effect on CuNi, 244
surface on steel coated with polybutadiene, 74
water + carbon mono and dioxide, 399

Phosphorus: infl on sodium, ferric chlorides' attack on Cr + or - Ni steels, 151
Pipeline steels, 30-48 inch, stress tests in hydrogen sulfide, 378
Pitting, see localized attack
Polarization: 2 and 3-electrode methods of lab linear analyzed, 126
Polarization: IR drop compensation, 143
Potassium: chloride vs FeNi alloys, 45
Potassium salts in coal gasification systems vs materials, 365
Potentials: protective for FeCr alloys at ambient temp., 47
Pressure: hydrogen attack related to, 7
Pressure: low, hydrogen adsorption at, 18
Pressional Educ. summary, 1
Repassivation: definition, 48
Review: CuNi erosion-corrosion in sea water, 242
Rhenium vs pitting of Ni by sulfides, 98

S

Safety: hydrogen attack standards related to, 19
Silicon: steel, C, infl on SCC in ammonium carbonate, 58

SODIUM
bromide vs Mo, 348
chloride vs 1 to 10 Cr, + or - 5 to 20 Ni + P, C, vs 30 C, 146
—3.5% vs Cr + Zn chromate on stressed 7075 Al, 137
—boiling sol. vs Al 7475 cartridge cases, 312
—vs CrNiMo pitting, Mo ions vs, 347
—vs Ni electroplate on U-Ti, 209
—pitting of 1808 in, 283
—pitting of 100-400 C oxides on steel in borate buffered sol., 309
—polybutadiene coatings on steel vs, 69
—steel, C vs ammonium carbonate, infl vs SCC, 57
—tolyltriazole on Cu vs, 340
—velocity effect of solutions on galvanic attack, measurement, 380
hot salts in coal gasification plants vs materials, 365
hydroxide, 10 and 50%, 316 and 332 C vs alloy steels, Ni-base alloys, 193
—13% vs C steel, 290 C, 224
—50% vs NiCrFe, SCC infl of Ni, 157
—vs iron, strain rate factor analysis in SCC, 353
—oxides formed on Fe, fracture under stress, 411
—SCC of iron and steel, infl of Ti, 303
sulfate infl on steel, C vs ammonium carbonate SCC, 57

Sound, effects: ultrasonic 200 kHz infl on 18-8 pitting in NaCl, 283
Specifications and standards: hydrogen-in-Ti, NBS std 353, 353, 354; 466

STEEL, CARBON
see also, steel, high strength
1010 vs chlorides, sulfates; molybdates as inhibitors, 263
1020, hydrogen diffusion, 370-620 C, 179
1055, 1074 hydrogen stress cracking, 52
1080 vs hydrogen sulfide-chloride sol., 64
ammonia vapor vs, 430
embrittlement by hydrogen sulfide, 321
organic coatings holidays galvanic attack at, 316
martensitic LC, hydrogen stress cracking, 52
mild, hydrogen effects, 9
mild and low alloy SCC in carbon mono and dioxide-water, 395

pitting of 100-400 C oxides by buffered NaCl sol., 309
SCC in NaOH, infl of oxide scales, 413
Ti as alloy vs SCC in NaOH sol., 303

Steel, chromium vs 10 and 50% NaOH, less than 332 C SCC, 193

STEELS, CHROMIUM-NICKEL
10Cr + 5 to 20Ni + P, C vs 30 C NaCl, sulfuric acid, 146
vs 10 and 50% NaOH, less than 322 C, SCC, 193
18-8 pitting in NaCl, 283
304, 304L, 316, effect of cold work vs boiling 65% nitric acid, 229
304L vs sulfuric acid/NaCl env., 271
316 vs Mg chloride, effect of resid. stress, 361
carbon mono + dioxide - water, infl on SCC, 400
coal gasification plant applications, 364
Mn-substituted, pitting and crevice attack, 274
Mo ions vs NaCl pitting in halide sol., 347
sensitization theories, 234

Steel, general: polybutadiene coatings on, vs aerated NaCl sol., 69

STEEL, HIGH STRENGTH
vs 120 C Ca nitrate cracking mode, 201
18Mn-5Cr-0.5C cracking, fracture mechanics analysis, 187
X65 line pipe fatigue cracking in petroleum + hydrogen sulfide, 472
4140 SCC in Ca and ammonium nitrate sol., 117
API grades, fractography of sulfide stress cracking, 102
ASTM A517 Grade F, SCC in 25 C liquid ammonia, 139
hydrogen effects, 9, 55, 423
pipeline, 30 to 48 in API steels vs sulfide stress cracking, 378

Steel, low alloy: 1Cr-0.5Mo hydrogen diffusion 370-620 C, 179
Steel, low alloy: 2.25Cr-1Mo hydrogen diffusion, 370-620 C, 179

STRESS
cracking of Al cartridge cases, infl of stress magnitude, 313
hydrogen attack, infl of cyclic, 10
residual in Inconel 600 tubes, 357
tensile, Fe vs NaOH, rate anal., 353
threshold for hydrogen cracking of C steels, 54

STRESS CORROSION CRACKING
304L in sulfuric acid NaCl env., 271
4140 in Ca and ammonium nitrate sol., 117
Al 7475 cartridge cases tested in boiling NaCl sol., 312
Al 7075 vs NaCl, infl of Cr + Zn anodized coatings, 137
Beta C Ti in methanol, salt water, 99
brass, alpha, effect of prior exposure to ammonium chloride or nitric acid, 336
brass CuZnSn in Cu sulfate, 469
Cr, CrMoTi, CrMoNi, NiCrFe alloys in 10 and 50% NaOH, 316 and 332 C, 193
defects in steels, infl on, 108
embrittlement of high strength steels by hydrogen sulfide, 107
hydrogen infl., 22
hydrogen steel, LC martensitic, 52
hydrogen sulfide in geothermal system, 21
hydrogen sulfide stress cracking fractographic analysis, 102
Inconel 600, infl of grain precipitates, 401
iron CrMn steels, fracture mechanics analysis, 187
NiCrFe alloys, infl of Ni vs SCC, 157
NiCrMoFeW in acids, and chlorides, 88
pipeline steels, hydrogen sulfide tests, 378
steel, carbon vs ammonia vapor, 430
—in ammonium carbonate, 56
—in carbon mono and dioxide-water sol., 395
—in hydrogen sulfide, 321
—low strength vs calcium and ammonium nitrate sol., 117
—oxide scales vs NaOH, 413
—Ti as alloy vs NaOH, 303
—martensitic, low C by hydrogen, 52
steel 116K YS vs 25 C liquid ammonia, 139
steel, high strength, 423
steels, high strength in Ca nitrate, 201
strain enhanced mechanisms, 26
strain rate factor analysis, iron vs NaOH sol., 353
stress (strain) magnitude factors in, 26
titanium + MoVFeAl infl of aging, hot working, 450
Zr in methanol-HCl sol., 276

Sulfates: molybdate inhibitor vs, 263
Sulfide stress cracking, see stress corrosion cracking
Sulfur: coal gasification, infl vs materials, 365
Sulfur: dioxide, tolyltriazole to protect Cu in, 339

SURFACE AND INTERFACE
acidification near Zn surface, preceding pitting in halides, 293
adsorption phenomena at low pressure, 18
boundary layer effects in water erosion-corrosion of CuNi, 247
cold working infl on 304, 316; 237
Cu, copper oxide, Cu-benzotriazole films on Cu, 216
gas adsorption infl on cracking, 16
hydrides on Ti, relation to NBS hydrogen-in-Ti standards, 468
hydrogen attack, 10
scale infl on C steels' SCC in carbon mono and dioxide-water, 400
steel surface reactors under polybutadiene coatings, 73
sulfide stress cracking of high strength steels, 107
surface profile effects on CuNi erosion-corrosion in water, 247, 249

Surface preparation: polishing sheet test specimens, holder for, 455

T

Tantalum: NiAl vs 870 C gases, as alloy, 481

TEMPERATURE
25 C liquid ammonia vs steel, high strength, 139
40-150 C carbon mono + dioxide-water SCC of C steels, 398
50 C peak for hydrogen embrittlement of C steel by sulfide, 330
60-90 C fresh water vs ZnAl, infl cathodic currents, 154
less than 100 C, hydrogen evolution on FeNi alloys in sulfuric acid, 41
100-350 C iron oxide films, 294
120 C Ca nitrate vs stressed high strength steels, 201
less than 140 C Li and W nitrate baths to anodized Al 7075, 135
316 C Na hydroxide vs NiCrFe, infl Ni, 157
316 C water, Ag/Ag chloride ref. anodes for use in, 374
316 and 332 C Na hydroxide vs alloy steels, Ni base alloys, 193
370-620 C hydrogen diffusion into C and CrMo steels, 179
870 C sulfur distillate fuel + sea salt combustion gas vs gamma and beta NiAl + alloys, 476
900-2500 C hydrogen production, 3
1100 C coal gasification environments vs NiCr steels, 364
fresh and salt water erosion-corrosion of CuNi, effect of, 245
hydrogen attack, infl of, 10
pitting and crevice attack on CrNiMnMo steels, infl of, 274

TEST, INSTRUMENTS
acoustic monitoring, 121
electrode, Th/ThCl reference, 140
ellipsometric for Fe oxide films, 100-350 C, 294
Mossbauer spectroscopy of Fe corrosion products, 432
polarization cell system, 407
silver/silver chloride reference anodes for 316 C water, 374
specimen holder for sheets during polishing, 455
velocity effects, galvanic attack, 380

TESTS, LABORATORY
ammonia vapor effects, 431
ASTM A262 Practice C vs 304, 316, infl of cold work, 229
benzotriazole films on Cr, 216
Cr + or - Ni steels vs NaCl, sulfuric, hydrochloric acids, 146
corrosion product analysis review, 433
deionized water, organic residues in, 203
erosion corrosion, 248
ferric chloride vs crevice in CrNiMnMo steel, 277
fractography of Al fatigue cracks, 163
hydrogen attack, 11, 19, 41
Inconel 600, boiling Mg chloride vs residual stresses, 360
iron carbide dissolution product analysis, 418
iron films in halides, spectrographic analysis, 297
linear polarization, error analysis, 126
magnetic effects on 410 corrosion fatigue, 109
microprobe analysis of tarnish films on Cu alloys, 254
polarization, IR drop compensation, 143
potentiokinetic, C steel vs NaCl, hydrogen sulfide sol., 64
quantitative anal. of BWR coolant, 226
SCC of 304L, grain boundary reactions, 271
—of Beta C Ti in HCl + methanol, NaCl, 99
—of steel, high, 423
—U-bend vs C-ring differences in NaOH, 200
ultrasonic effects on 18-8 pitting in NaCl, 283

Tests, nondestructive: acoustic emission, 123
Tests, on site: acoustic emissions to monitor reactions, 121
Thallium-ThCl reference electrode, 140
Tin: 80SnCu vs aerated and deaerated carboxylic acids, 30
Tin: CuZnSn, infl of Sn on SCC in Cu sulfate, 471

TITANIUM
+ +al-8V-6Cr-4Mo-4Zr, SCC in salt water, methanol, 99
beta meta stable, infl of aging, hot working on SCC, 450
NiAl vs 870 C gases, as alloy, 481
NiCrMoFeW, as stabilizer vs hot chlorides, 93
steels, C as alloy vs SCC in nitrate sol., 120
steel, C, as alloy vs SCC, in NaOH sol., 303

Tritium absorption by Cu, 371
Tungsten: NiCrMoFeW, infl vs ferric chloride, 92
Turbines, Gas: 410 turbine blades, fatigue tests, infl of residual magnetism, 109

U–V

Underground: iron corrosion product analysis, 435
Uranium: hydrogen embrittlement of Mo, Nb, and Zr stabilized, 442
Uranium: Ni electroplate vs atmos, NaCl sol., infl of porosity, 209
Vanadium salts in coal gasification systems vs materials, 366
Vapor: ammonia, SCC of mild steel from, 430
Velocity: electrolyte, measuring effect on galvanizing attack, 380
Velocity: sea water vs CuNi, 243
Velocity: sulfuric acid vs 200 Ni, infl of oxygen, benzotriazole, 438

W–Z

Waste control, corrosion's role in, 261

WATER, GENERAL
316 C, silver/silver chloride ref. anodes for, 374
brass 70/30 inhibition by azoles, vs, 415
carbon mono + dioxide solutions SCC of C steel, 397
inhibition of steel SCC in anhydrous ammonia, 431
iron corrosion product analysis, 436
organic coatings permeated by, 69
vs steel, high strength in 25 C liquid ammonia, 141
vs SCC of Zr in methanol-HCl sol., 276
vapor in argon, effect on Al fatigue crack fractography, 169

Water, high purity: iron MnFe cracking, fracture mechanics analysis, 187
Water, high purity: organic residues in deionized infl on CrNiFeMoMn alloys in sulfuric acid, 203
Water, high purity: PWR systems vs Fe oxide, hydrogen activity, 224
Water, salt: beta C Ti 38-6-44 SCC in, 99
Water, sea: CrNiMnMo steels, 2.5 yr vs, 276
Water, sea: CuNi erosion-corrosion, literature review, 242
Water, sea: turbulent, galvanic series of metals in, 248
Welding: API pipeline steels, high strength, hydrogen sulfide tests, 379
Welding: NiCrMoFeW vs acids, 84
Welding: steel, C, SCC in carbon mono and dioxide-water env., 395
Zinc 99.99 + vs halides, 285
Zinc + Al, infl on grain boundary attack under cathodic currents, 152
Zirconium: SCC in methanol-HCl sol., infl of water, 276
